- Ability to output co-cr

Lava™ ST Scanner: Client Comment

"Working with the Lava ST Scanner gives me confidence that the marginal fit is always 100%. The translucency of this material allows me to create ideal anatomical frames or minimal 0.3 copings. Either way the aesthetics are always great. Most importantly, Lava makes my work more fun".

Julian Dorey - Kingsbridge Dental Laboratory - Devon

Lava™ Chairside Oral Scanner c.o.s. Coming Soon! 3M ESPE

Dentists/Doctors will soon be able to enter the 3M ESPE Digital Workflow, and offer patients the convenience and comfort of digital impressions.

3M ESPE, the worldwide market leader in impression materials, will soon introduce the Lava™ Chairside Oral Scanner C.O.S. The Lava C.O.S. is the entry point to the digital workflow and is a digital impression system that will enable the high-speed capture of accurate and precise impressions.

Unique "3D-in-Motion" technology captures real-time video.

Designed to work with both conventional and CAD/CAM processes.

Ready to experience the latest in high-tech dentistry?

Stay tuned for more information on the Lava C.O.S. and when it will be available in your area.

What Our Clients Say About Us

“The benefit of being milled here in the UK/London is worth so much to us, quicker turnaround, easy communication as to what we want. Above all, these guys are relentless to supply a coping/bridge as close to the shade we want with a fit that is second to none”. **Clive Ely - Harley Street**
